# Swim Platform

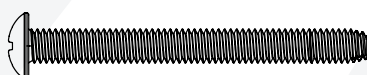

Assembly & Installation Guide  
WB.SP.03

## STEP 1

Arrange all parts and hardware to begin assembling the Swim Platform.

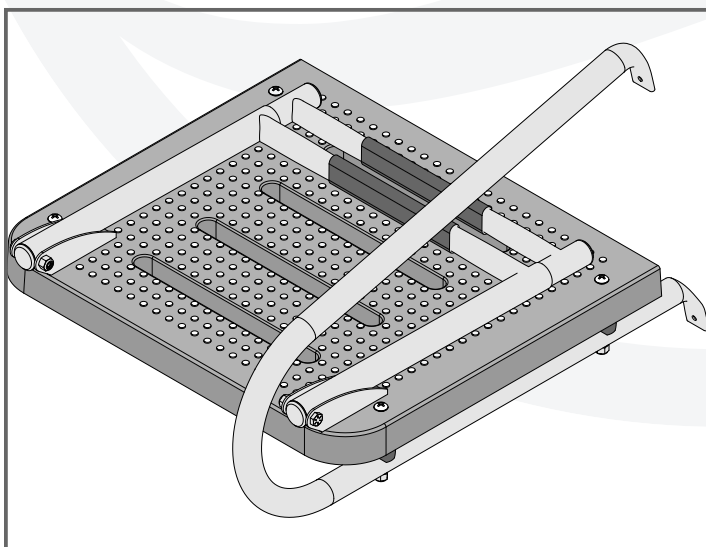

## STEP 2

Mount the Swim Platform onto the Handle Bar and Platform Supports.

## NOTE

Use the provided bumpers to mount the swim platform onto the frame.

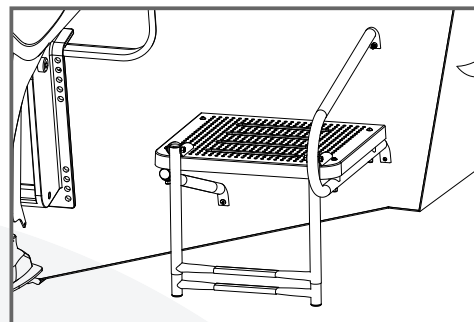

## STEP 3

Tighten all nuts prior to mounting to transom.

Assembly & Installation Guide  
WB.SP.03

## STEP 1

Mark top hand rail mounting location and confirm with Lead Rigger/Shop Foreman. Do not mark hole location inside of the side wall.

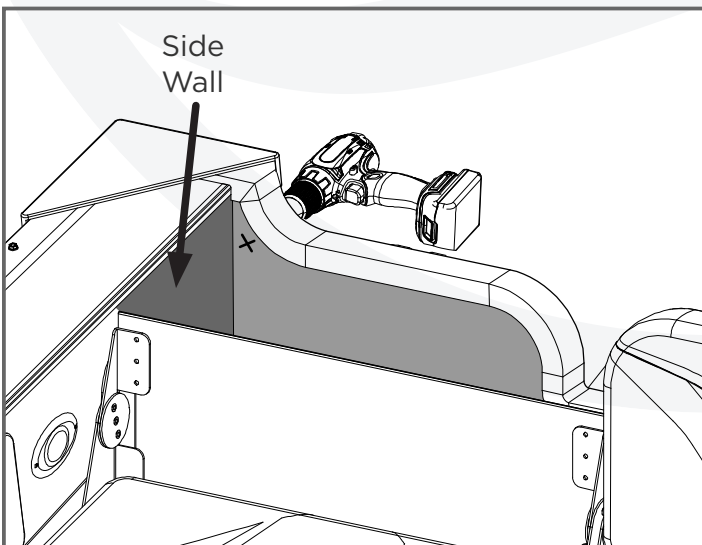

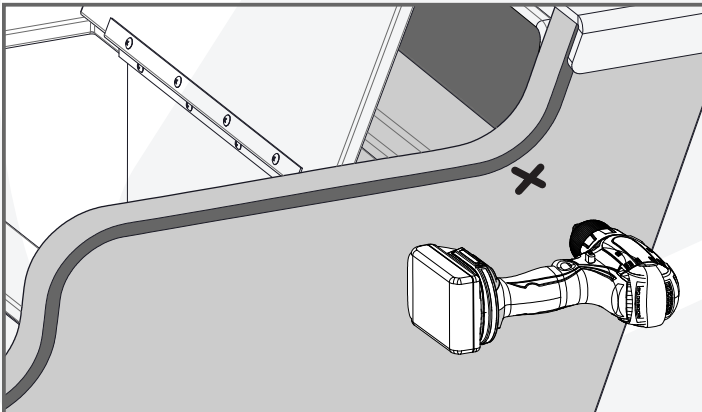

### NOTE

Handrail mounting hole location is boat specific. Ensure the hole is close to the side wall and will accommodate the Bolt & Washer from the interior to bolt railing in place. If there is no side wall, ensure the Swim Platform does not extend past the transom (hatched area).

## STEP 2

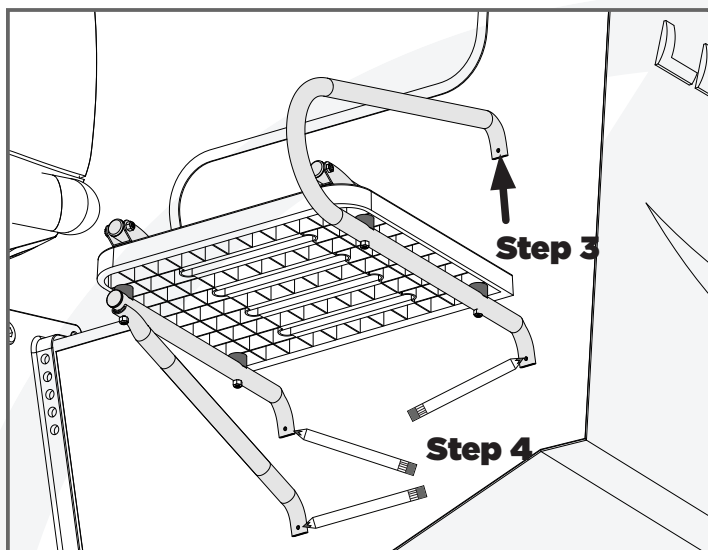

Using a 1/4" drill bit, drill a pilot hole through the transom ensuring the hole is accessible from the inside of the Stern for Through Bolt access (B4).

# Swim Platform

Assembly & Installation Guide  
WB.SP.03

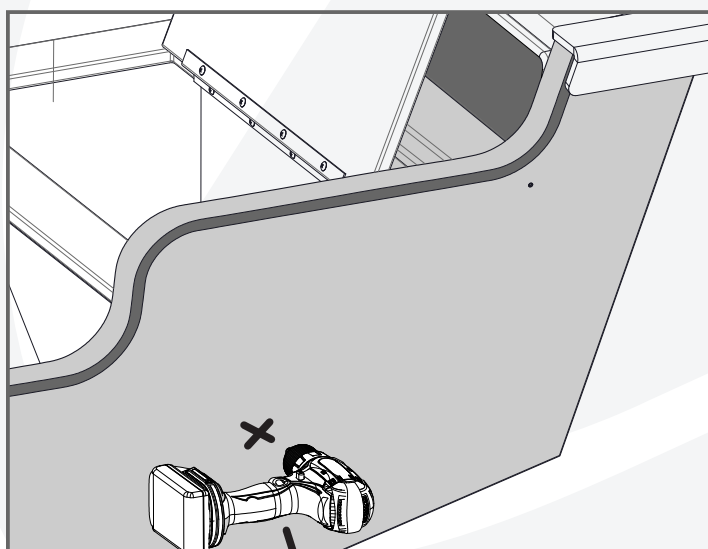

## STEP 3

Mount the swim platform onto the Hull and bolt the Hand Rail in place using the supplied hardware.

## STEP 4

With the assistance of a Lead Rigger/Shop Foreman, mark the remaining mounting locations of the Swim Platform.

Remove the Swim Platform to continue installation.

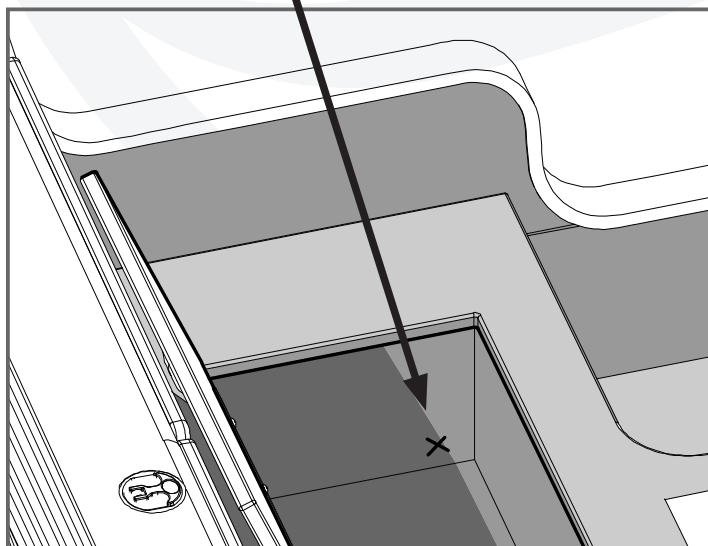

## STEP 5

***\*Read below attention before proceeding with step 5\**** Using a 1/4" drill bit, drill a pilot hole through the upper left marked hole of the transom ensuring the hole is accessible from the inside of the stern for through bolt access (B4).

## ATTENTION

Ensure no cords or fuel separator are at risk of being drilled into. Some models will require carpeting/flotation foam to be removed before drilling into the hull.

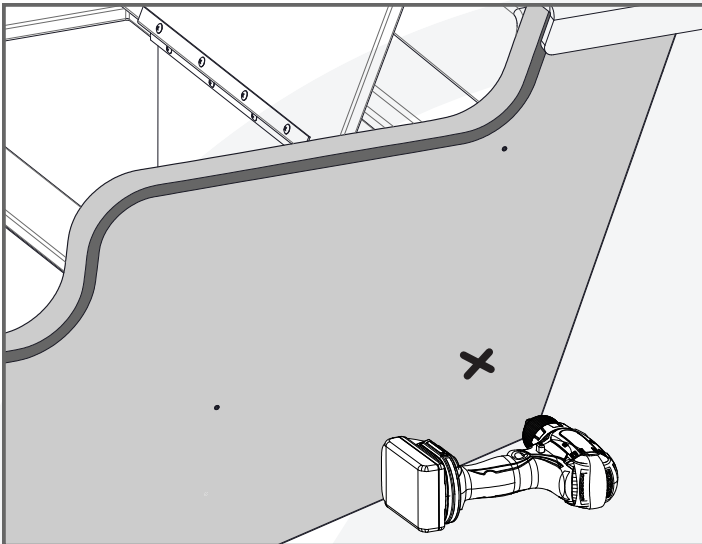

## ATTENTION

For F17 & F19 Pro Boats, using a 1/4" drill bit drill a pilot hole through the aluminum Hull only, to accommodate the Screw (S1).

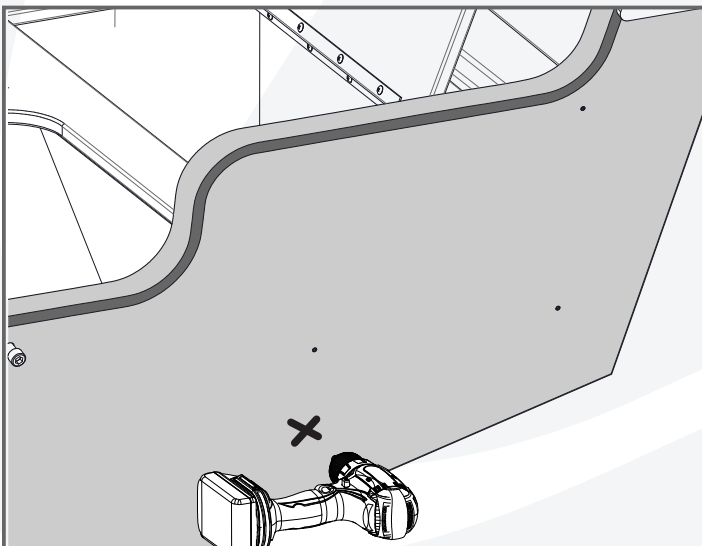

# Swim Platform

Assembly & Installation Guide  
WB.SP.03

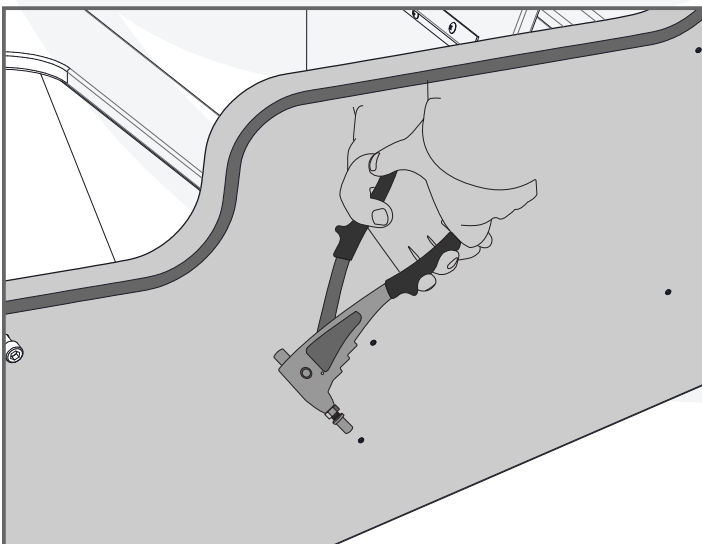

## STEP 6

Using a 1/4" drill bit, drill a pilot hole only through the Aluminum of the Hull to accommodate the Wood Screw (S1).

## STEP 7

Using a 25/64" drill bit, drill a pilot hole approximately 2" into the aluminum Hull to accommodate the Rivet Nut (N2).

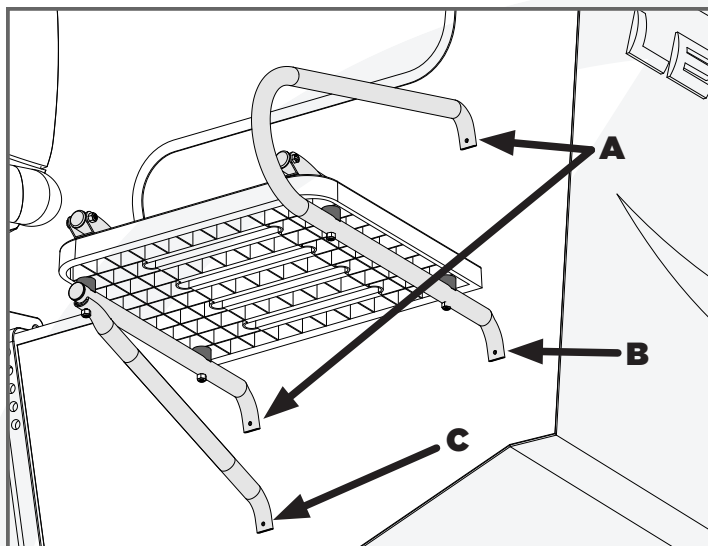

## STEP 8

Using a Nutsert Gun, insert the Nut into the bottom pilot hole and install in place (N2).

# Swim Platform

Assembly & Installation Guide  
WB.SP.03

## STEP 9

Install the swim platform onto the Transom using the previously drilled pilot holes.

**A.** Mount the swim platform onto the Transom and bolt the Hand Rail and Platform Support using the supplied hardware.

**B.** Screw in the bottom Hand Rail using the (S1) Wood Screw.

**C.** Bolt the bottom Platform Support into the Rivet Nut using the (B5) Bolt.

## ATTENTION

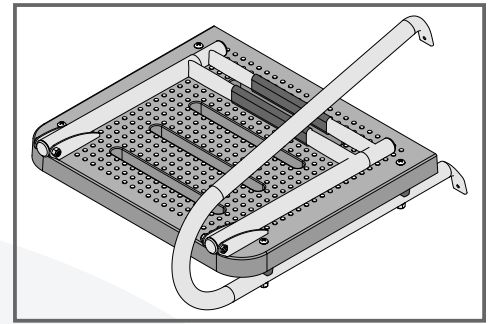

Silicone all hardware before tightening to prevent any water damage.
